

Rearsby NP ANNEX D2

Summary of 'housing' discussions at Drop-in 19 November 2016

Discussion was focused on ideas for where new housing could take place : there was still only support for small-scale infill construction.

People placed markers on the map as ideas for small sites of one or more potential property.

The green markers signified places that might be feasible as affordable housing for elderly residents.

General comments were also provided and placed on the map in relation to various points.

These contained the following references:

Can any affordable housing be protected from the buy-to-let market?

The Horse & Groom should be converted into accommodation and other affordable housing built in the grounds.

Keep the appearance of new properties in line with other existing properties.

Keep community / low-cost accommodation for the next generation, so they can live and work in the village.
